

Report

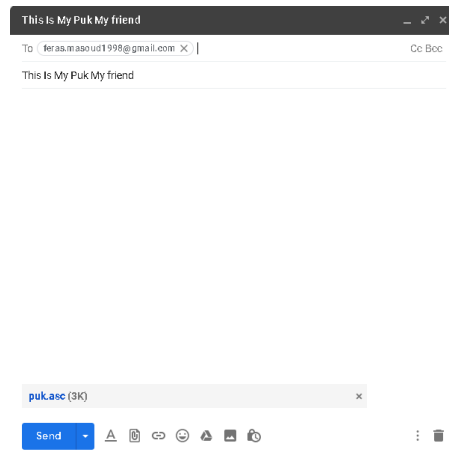

Make a partner to communicate with him/her securely

feras.masoud1998@gmail.com

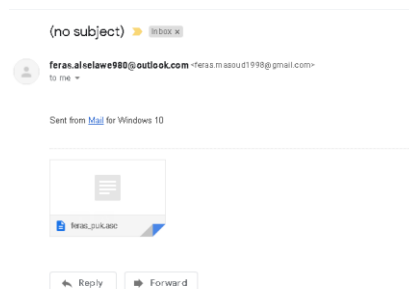

Create PGP keys.(you must use your name and e-mail)

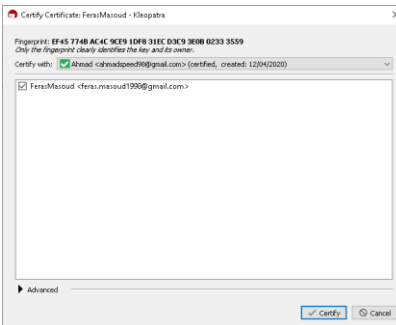

| Name | E-Mail | User-IDs | Valid From | Valid Until | Key-ID |
|-------|------------------------|-----------|------------|-------------|---------------------|
| Ahmad | ahmadspeed98@gmail.com | certified | 12/04/2020 | 12/04/2022 | 37C7 FE7C 596B 7E6C |

Distributing your Public Key with your partner via e-mail.

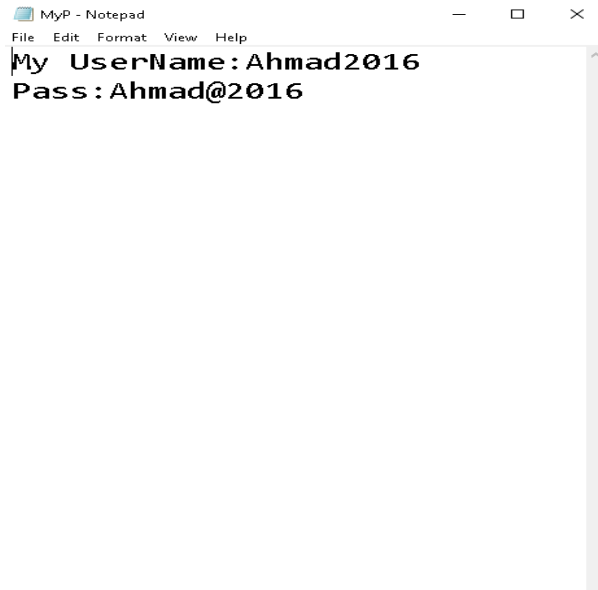

Obtaining and adding partner's Public Key to your keyring.

Use the PGP encryption software to send (encrypt and sign) and receive (decrypt) secure files (text file, image file and messages) with your partner using e-mail.

Files should contain sensitive information

2. You should show how the signing work when you modify data in the Original file

Example: when we modify the data after sign it as I did in the video

Sign/Encrypt Files - Kleopatra
