

## HW#1: Tag Library

Due date: 17/12/2020

5 Marks

Using JSP, create a custom Tag Library named “*student*” that has two attributes: “*name*” and “*ID*”.

The purpose of this taglib is to print the student name and its ID as following:

Student name: [*name*]

Student ID: [*ID*]

After you create this taglib, you must use it with your name and your ID.
