

TASK # 7

Develop a C# Windows Form Application that allows users to do all of the following.

1. Draw the following shape:

- a) The Size of the Shape depends on the users Mouse Down and up and from any point in any direction on the Drawing Panel.
2. The user will be able to select any shape (a selected shape is distinguished by a temporary Blue rectangle around it).

3. The user will be able to move the currently selected shape.
4. The Shapes must be permanent on The Drawing Panel when the user minimize or maximize the Form.
